

As a resident of the State of N.J. I am imploring you not make any changes to the Telephone Consumer Protection Act that would in any way restrict the do not call list for the State of N.J. The added protection I receive from the N.J. do not call list has been well worth the time that it took to register. Myself, and every other resident of this state would be saddened to find out that we will once again be subjected to phone calls from telemarketers even under the restrictions of the federal program. The federal do not call list was a great idea, but it simply did not go far enough therefore making the N.J. do not call list a neccesity.
